

## Master Lock Launches New Safety Padlocks

Mayo Hardware will present at The Safety Show Sydney the entire range of its Master Lock Lockout/Tagout Solutions, including newly launched safety padlocks, hasps and lockout cables for smaller diameter lockout points.

The S31 safety padlock has a durable non-conductive Zenex™ lock body and a 4.76mm marine grade 316 stainless steel shackle. Available in nine colours, S31 safety padlocks are extremely light in weight, perform in extreme conditions and can withstand harsh chemicals and corrosion.

The S31 safety padlock also comes with a durable weather tough cover that seals at the shackle and keyway keeping out dust, dirt and grime.

A lockout hasp is vital when work is undertaken by more than one employee. The S430 and S431 hasps fit smaller lockout points. The S430 has a plastic body, closes like a book and accepts two lockout hasps. The S431 is constructed from 316 stainless steel for highly corrosive environments.
